CAREER OBJECTIVE

Motivated Computer Engineering undergraduate with an interest in computer systems, networking, and cybersecurity fundamentals. Seeking opportunities to learn, apply core concepts, and grow through hands-on technical experience.

EDUCATION

K.C. College Of Engineering & Management Studies & Research — Thane, India
Bachelor Of Computer Engineering | GPA: 7.75 — **November 2022 – Ongoing**
MHT-CET (Engineering Entrance Exam): 90.55 Percentile

SKILLS SUMMARY

- **Languages**: Python, SQL
- **Tools**: Git, GitHub, Android Studio, VS Code, Antigravity
- **Platforms**: Firebase, Kaggle, Google Colab
- **Soft Skills**: Adaptability, Persistence, Effective Collaboration.
- **Networking:** OSI Layers, Network Protocols.

INTERNSHIPS

Cybersecurity Intern (Onsite) – PageNTRA Infosec Pvt. Ltd., Bhandup — **Dec 2025 – Mar 2026**

- Working on a **website defacement detection system** under mentor guidance.
- Studying how website content changes can indicate **unauthorized modifications.**
- Learning the **basic workflow of detection systems** used in cybersecurity environments.
- Assisting in understanding how alerts are generated when abnormal changes are observed.
- Gaining exposure to **practical cybersecurity concepts through real organizational work.**

AI & Cloud Intern (Online) – Edunet Foundation (IBM SkillsBuild) — **Sept 2025 – Oct 2025**

- Working on a project-based internship under mentor guidance to implement AI & Cloud solutions.
- Developing a project using SkillsBuild platform to solve real-world challenges in AI/Cloud.
- Engaging in weekly masterclasses and applying learnings in hands-on project tasks

Conversational Data Analysis Intern (Online) – VOIS & Vodafone Idea Foundation — **Sept 2025 – Oct 2025**

- Learning and applying techniques for analyzing conversational data using LLMs.
- Participating in mentor-led sessions and hands-on projects focused on NLP and AI deployment.

PROJECTS

SmartNav– IoT Smart Wheelchair (Private Repository) — **Aug 2025- Ongoing**

- Developed a cross-platform mobile application to support voice, manual, and joystick-based control for wheelchairs.
- Built Outdoor Navigation function using Open-Source Routing Model (OSRM).

Emotion Prediction Desktop App — **Feb 2025 – Mar 2025**

- ML-powered application to classify emotions from text/voice using Python, scikit-learn, and PyQt.
- Designed model pipelines and GUI for user-friendly interaction.

Datadash App — **Aug 2024 – Nov 2024**

- Built a secure cross-platform data sharing tool using TCP/UDP sockets with encryption.
- Developed desktop (Python), Android (Java/XML) clients for end-to-end functionality.

CERTIFICATES

Python Programming (Kaggle) — **July 2025**

- Mastered Python syntax, loops, functions, and core data structures.
- Built foundational coding skills applicable to automation, data handling, and analysis.

Introduction to Machine Learning (Kaggle) — **July 2025**

- Learned ML concepts, data preprocessing, and model evaluation techniques.
- Applied algorithms to build predictive models for practical use cases.

What is Generative AI? (LinkedIn Learning) | — **September 2024**

- Studied generative AI concepts, tools, and real-world applications.
- Understood ethical considerations and use cases in AI-driven solutions.
